Recent publications from NHS Fife staff: September 2022

This monthly bulletin aims to raise awareness of research activity across NHS Fife.

Core medical/health databases were searched to identify articles where at least one author is a member of staff from NHS Fife. Research activity may have been carried out solely by NHSF staff or in collaboration with colleagues from external institutions. The database search is supplemented by information supplied by the Pure team at St Andrew's University.

Databases searched: Medline, Embase, PsycInfo, Cinahl.

We searched for records added to the databases during September 2022.

We included: articles, conference abstracts, letters.

Where practicable we excluded: errata, corrections, comments, author's responses.

Local authors are highlighted in **yellow** so they can be readily identified.

NHSS employees and other eligible staff from partner organisations should be able to use the links to access the full-text of articles. If prompted to login, use your NHSS email and password, or your OpenAthens login details. Contact the Library Service for assistance with accessing full-text. If we do not have access to the full-text of an article, we may be able to obtain a copy from the British Library.
